

SUPERSTORE SALES ANALYSIS

Sales Performance & Profitability Analysis | 2015–2017

OBJECTIVE

Identify the main drivers of sales, profitability and regional/category performance to support better business decisions.

Executive Summary

The dashboard highlights growth, regional strength and a profitability gap.

- West is the strongest region in both sales and profit.
- Furniture generates sales comparable to Technology but has only a 2.49% profit margin.
- Extreme discounts, reaching up to 70% in some cases, can erode Furniture profitability.
- Technology and Office Supplies deliver approximately 17% margins.
- Sales show continuous growth from 2015 to 2017.

Regional Performance

West leads the business on both revenue generation and profit.

BUSINESS INTERPRETATION

West appears to combine strong demand with stronger profitability.
Its successful products, customers and sales practices are worth investigating and replicating.

Category Performance

Furniture demonstrates the gap between revenue performance and profitability.

KEY INSIGHT: HIGH SALES ≠ HIGH PROFIT

- Furniture sells at a level comparable to Technology, but its margin is dramatically lower.
- Extreme discounts can destroy the value created by strong sales volume.
- Management should review discount thresholds and identify the point where additional discounting stops being profitable.

Sales Trend

Sales show continuous growth across the 2015–2017 period.

Recommendations

Turn sales momentum into sustainable, profitable growth.

01

Optimize Furniture discounts

Review discount policies and establish thresholds that protect margins.

02

Learn from West

Identify successful products, customers and practices that can be replicated.

03

Track profitable growth

Monitor Sales, Profit and Discount together—not revenue alone.

04

Scale what works

Use the strongest categories and regional drivers to support future growth.

The priority: transform strong sales growth into sustainable and profitable growth.
